

SC-90 NOW A 3-IN-1 FOAMING STAINLESS STEEL CLEANER – CLEANS, PROTECTS AND POLISHES

Our product development team are pleased to announce a new and improved formulation for our stainless-steel cleaner SC-90.

SC-90 has changed from an oil to a white foam specifically formulated for cleaning stainless steel and bright metals, that lifts invisible grime, polishes, and protects in one application.

It is formulated with a light oil emulsion which leaves a non-greasy protective film that resists fingerprints and watermarks.

A very effective cleaner which lifts and removes grime easily and with minimal effort required – see for yourself just how easy it is to use.

SC-90 reduces the risk of re-contamination by eliminating run-off due to its stable, high-cling foam and is non-transferable to other surfaces, unlike 'wet oils'.

Furthermore, the product improvement means that it now has twice the number of NSF category registrations: A7 & C1.

SC-90

NSF A7 AND C1 STAINLESS STEEL CLEANER

NEW &
IMPROVED

New & Improved Highlights:

- A white foam cleaner that clings to vertical surfaces
- Long-lasting shine and non-greasy polished finish
- Cleans and removes grime easily
- Protects against dirt attraction, fingerprints and watermarks
- Specially designed for cleaning stainless steel, chrome plating, powder-coated surfaces and aluminium
- NSF A7 & C1 registered – twice the number of 'food grade' categories!

Product codes remain the same.

RELATED PRODUCT

The previous version of SC-90 was a traditional 'wet oil'. If this finish is preferred, please use our established and trusted 'food grade' version of AC-90: "AC-90 H1".
