Specifying Kee Klamp® Components

Each fitting has a simple numerical code reference, which defines the type of fitting and the pipe size, or sizes, it is designed to receive. The first number, preceding the dash (-) identifies the type of Kee Klamp fitting. A single digit, following the dash, defines pipe size. Two single digits after the dash indicate that the fitting is designed to receive two sizes of pipe.

Examples:

10-8

Kee Klamp Fitting Type **10**

Both sockets 'A' and 'B' designed to accept pipe size **8**

45-76

Socket 'A' designed to accept pipe size **7**
Socket 'B' designed to accept pipe size **6**

Kee Klamp Fitting Type **45**
